

OUTDOOR SPA

Enjoy the romantic SPA time, enjoy the star-rated spa experience, the strong water impact every inch of the skin, the depth of the massage force, to bring you a different comfortable experience.

- 1 Our jacuzzis have a closed base plate made of GRP with an aluminium frame built on them. It doesn't get any more solid and durable than that.
- 2 The Gecko control system offers significantly more than other systems on the market. At just a touch of the finger, you can programme filter times and lighting scenarios in combination with many other options.
- 3 The multilayer tub construction consists of glued acrylic, vinyl resin, and an anti-bacterial coating and is therefore extremely stable and durable.
- 4 The specially reinforced base plate has 40mm of insulation and ensures that you can still enjoy your SPA even years down the line.
- 5 Due to the closed construction method, the front panel is permanently connected to the frame and ensures high stability.
- 6 A sound-absorbing fibre is used for sound insulation. This keeps the noise to a minimum.

Create a new era of bathing
Enjoy the surf pool and
spend time with friends and family

Pour a glass of wine,
order some music, and enjoy a
spa massage while chatting with
friends and family
